

APPLICATION FOR FROZEN EMBRYO PERMIT With Transfer Report

I hereby acknowledge that I have read and agree to be bound by and follow the AQHA rules pertaining to frozen embryos. I also understand that AQHA will investigate non-compliance with these rules and, in the event of such non-compliance, any resulting foals may be ineligible for registration.

A frozen embryo is a <u>fertilized</u> egg flushed from a donor mare that is preserved in frozen storage for purposes of being transferred into a recipient mare at a later date. This form is <u>not</u> to be used to request permits for a frozen oocyte for which there is a separate form. A frozen oocyte is an <u>unfertilized</u> egg flushed from a donor mare that is preserved in frozen storage for purposes of being subsequently fertilized and transferred into a recipient mare at a later date.

I understand that one Frozen Embryo Permit is required to register a foal produced using an embryo from a mare no longer in my ownership. The signed permit will serve as the breeder's certificate for registration of the foal.

As the mare owner, I understand that I must ensure that a sufficient number of Frozen Embryo and/or Frozen Oocyte Permits are purchased prior to my sale of the mare, and I understand that I must complete an application for each permit needed. Once the ownership changes, I understand that I may no longer purchase Frozen Embryo or and/or Frozen Oocyte Permits from AQHA.

lare's Name Regist		tration Number
